

Coffee Community serves the stars at Glastonbury

A specialist in the supply of mobile beverage units, Coffee Community @G will be mixing with the stars at the Glastonbury Festival this year. Behind the famous Pyramid stage, one of Coffee Community's Malabar Espresso Bars will be serving perfect cappuccinos to the cream of the world's rock and pop acts as they wait to perform.

Expert espresso events company, The Daily Grind, will run the bar with support from Coffee Community's Baristas.

Coffee Community's expertise in the

mobile beverage bar sector is unrivalled and the company has recently introduced two new innovations. The Mini Malabar is a scaled down version of its already successful Malabar range. The units are designed for easy manoeuvrability around a hotel to provide a bean-to-cup option for conference delegates.

Following on from the designs for the bars built for the Tate Modern Gallery, Coffee Community has launched a mobile espresso bar unit that has a glass frontage that is lit from behind. This creates a striking impression with

the whole bar glowing in different coloured lights - even fading from one to another.
